Deskripsi:

SEO merupakan fondasi penting untuk meningkatkan trafik organik. Project ini merancang workflow otomatis dari riset keyword hingga pembuatan content brief. Input berupa daftar keyword target dianalisis secara otomatis dengan crawling konten kompetitor, kemudian diproses AI Agent untuk menghasilkan rekomendasi struktur konten, subtopik, dan keyword tambahan. Hasil akhir berupa *content brief* siap pakai yang tersimpan di Google Sheets.

Tools & Teknologi: n8n, Apify Website Crawler, AI Agent (Gemini/OpenAI), Google Sheets.

Kontribusi Saya: Mendesain pipeline keyword → crawling → analisis AI → content brief. Mengintegrasikan Apify & AI ke n8n, serta memformat output agar usable bagi tim konten.

Hasil / Output: Proses riset manual dipangkas hingga 90%, menghasilkan lebih dari 20 content brief dalam sekali eksekusi.

Catatan Keberlanjutan: Workflow dapat diskalakan untuk tim konten besar.
